CLOUD SERVICES

Cloud refers to applications, services or resources made available to users on demand via the Internet. Companies typically utilize cloud-based computing as a way to increase capacity, enhance functionality or add additional services on demand without having to commit to potentially expensive infrastructure costs or increase / train existing in-house support staff. Cloud services which we provides are,

- Software as a Service (SaaS)
- Platform as a Service (PaaS)
- Infrastructure as a Service (IaaS)

CUSTOM SOFTWARE SOLUTIONS

Corbe technologies has developed a number of products and Web applications for its clients in this service. Our mature software development processes, combined with excellent infrastructure have significantly increased the "on-time and on-budget" delivery of software in the offshore mode. Custom Application Development/ Maintenance It is a well known fact that some of the ready-made, packaged applications have failed to meet the requirements of the customers because of their unique needs and differing business practices and processes. In addition, prohibitive cost of implementing a packaged application and the maintenance thereafter becomes an unwelcome perspective. We have experienced I.T. Consultants for Project analysis, formulation and concept planning, right up to project management and installation. We develop customized Software that is completely based on user's requirement with GUI (graphical user- friendly interface) on any of the mentioned platform / languages.

WEB APPLICATION DEVELOPMENT

Corbe provides web solutions & services to help customer reach to a wider customer base. The web is a new and different medium for communication and requires a different viewpoint and skill set to use it in the most effective way. You need web consulting to get more return on your investment in your web site. We can help you get the most effective solution through:

- Website Development
- Custom Web Application
- Web ERP Development

- CMS Web Development
- Web hosting
- E-commerce

CORPORATE BRANDING

Corporate branding involves marketing various products or services under the name of a company. Product branding, on the other hand, is a marketing strategy where in a business promotes and markets an individual product without the company name being front and center in the advertising campaigns or even on the product labeling. Management strategies for choosing which avenue to pursue or a combination of the two in branding vary by business and each approach produces results.

- **Corporate identity**
Logo designing | Branding | CD Profile | Satationery | Corporate Videos
- **Marketing**
Website design | E-commerce | Brochures | Presentations | Carton& label design | Multimedia | Banner& hoarding Advertising | Consultancy | E-marketing | Direct mailers | Promotions
